

Section D -- Employment and Compensation

This section presents data on the service and compensation of railroad employees covered under the railroad retirement and railroad unemployment insurance programs. Under the railroad retirement program, different maximums on compensation subject to retirement tax have been in effect since 1979 for tier I and tier II financing. Until 1985, the tier I maximum corresponded on a monthly basis to the annual maximum provided under current social security law. The tier II maximum is based on lower limits determined under pre-1977 social security law. The tier I and tier II annual compensation maximums for 2005 were \$90,000 and \$66,900, respectively. For 2006, the tier I limit increased to \$94,200 per year, while the tier II limit was \$69,900 per year. Under the unemployment program, the taxable earnings base was the first \$1,150 of each employee's monthly earnings in 2005 and \$1,195 in 2006. In these tables, creditable compensation, unless otherwise specified, refers to the tier I amount creditable under the Railroad Retirement Act. Except for table D1, tier I payroll excludes miscellaneous compensation taxable at the tier I tax rate.

The more important qualifications of the data are shown in footnotes to the tables.

Certain general observations about the figures and definitions of the terminology used are as follows:

1. Class of employer is based on classifications established for reporting to the Surface Transportation Board. The base year used in calculating revenue is 1991. Class I railroads in 1991 were those with operating revenues totaling \$250 million or more per year, class II railroads were those with less than \$250 million but at least \$20 million in operating revenues, and class III railroads were those with less than \$20 million in operating revenues and all switching and terminal companies regardless of their operating revenues. Current operating revenues are deflated by changes in the annual average Railroad's Freight Price Index developed by the Bureau of Labor Statistics for comparison with the established thresholds. For calendar year 2005, the deflator percent was 78.29.
2. The employer shown for employees reported by more than one employer is the last employer in the year.

3. A month of service is a month in which an employee performs any service, however slight, for which creditable railroad compensation is reported. Continuous service refers to service by an employee in one or more months of each year over a period of years. Completed years of service, on the other hand, are based on total months of service. Effective for earnings years 1985 and later, an employee who had an employment relation or was an employee representative in months in which he did not perform railroad service may be deemed to have additional railroad service months if his railroad earnings for the year exceed one-twelfth of the tier II yearly compensation maximum times the number of months actually worked in the calendar year. These deemed months are included in the calculation of completed years of service. One completed year of service represents service in 12 to 23 months; two completed years, service in 24 to 35 months, etc.
4. Data in the tables are based on reports of service and compensation made by employers and processed for inclusion in the Board's data processing records shortly after the end of the calendar year. Late reports were last included in 1987.

Table D1.--Number of employees and their compensation, for all employers and class I railroads, 1937-2005

¹ Tier I and Tier II taxable payrolls had equal monthly earnings bases through 1978. Bases became annual in 1985. Beginning in 1982, tier I payroll includes miscellaneous compensation.

² Average of 12 mid-monthly figures.

NOTE.--Compensation data revised to include delayed reports. Average employment and total compensation based on Surface Transportation Board (STB) reports. For all employees, such data include estimates of employees and compensation not reported to the STB.

¹ Includes employees whose sex was not reported.

² Not available.

NOTE.--Employees separated represent employees (including those who died or retired) who worked in a year but not in the following year; new entrants are employees with no previous railroad service and reentrants are those who returned to railroad service after an absence of at least one calendar year.
