

Section C -- Unemployment and Sickness Benefits

This section presents data on unemployment and sickness benefits paid to qualified railroad employees under the Railroad Unemployment Insurance Act (RUIA). Railroad unemployment and sickness benefits, by law, are based on a July-June benefit year. Therefore, railroad unemployment and sickness insurance benefit operations are presented on a benefit year basis, rather than on a fiscal year basis.

Normal benefits of each type may be paid for as many as 130 days in a period of 26 or more weeks but may not exceed the total creditable base year compensation of the beneficiary. After exhaustion of normal benefits, an employee with 10 or more years of railroad service may receive additional benefits in an extended benefit period provided they have not voluntarily retired, have not left work without good cause (for unemployment benefits only), and are less than 65 years old (for sickness benefits only). Extended benefits are paid in a 13-week period.

The Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, enacted March 27, 2020, authorized payment of special extended unemployment benefits, enhanced unemployment benefits to those that received regular unemployment benefits in benefit year 2019-2020, and waived the waiting period for unemployment and sickness benefits. Only special extended unemployment benefits and enhanced unemployment benefits began paying out during benefit year 2019-2020. Provisions included the following:

- All benefits paid under the CARES Act were exempt from sequestration.
- Key points of the special extended unemployment benefits were:
 - Railroad employees who previously were not eligible for extended unemployment benefits because they did not have 10 years of railroad service were eligible for up to 65 days within an extended period consisting of 7 consecutive 2-week registration periods.
 - Railroad employees who were previously eligible for extended unemployment benefits of up to 65 days were eligible for extended benefits of up to 130 days within an extended period consisting of 13 consecutive 2-week registration periods.
 - Benefit periods had to begin no later than December 31, 2020
- Enhanced unemployment benefits of \$1,200 were payable for any unemployment registration period beginning on or after April 1, 2020, but no later than July 31, 2020. This benefit was in addition to regular or special extended unemployment benefits.
- The seven day waiting period was waived for both unemployment and sickness benefits for any registration periods that began on or after March 28, 2020 and ended on or before December 31, 2020.

An employee was qualified for benefit year 2019-2020 if in the preceding calendar (base) year their compensation for railroad work, excluding earnings over \$1,605 a month, was \$4,012.50 or more. Additionally, if the employee was a new entrant to the industry in the base year, they must have had at least five months of service in that year. For a long-service employee (one with 10 or more years of railroad service) a benefit year could be started early if they were not currently qualified but would be qualified for the next benefit year. Also, an extended benefit period could continue beyond the usual June 30 ending date of a benefit year and thus extend the duration of the employee's benefit year. Therefore, the tables in this section on payments for unemployment and sickness that occurred during the July 2019 - June 2020 period include benefits that technically were payable in extensions of the 2018-2019 benefit year or accelerations of the 2020-2021 benefit year as well as those payable for the general benefit year (2019-2020).

Table C1 shows the principal figures for operations in benefit year 2019-2020 and other recent years. Figures in this table refer to payments made and other administrative actions taken under the unemployment and sickness programs during the designated benefit year. Table C2 provides various unemployment and sickness benefit and beneficiary data for benefit years 1990-1991 through 2019-2020. Tables C3 through C7 contain benefit data for unemployment and sickness which occurred in claim periods paid during the particular benefit years stated in the table headings or to which reference is made in the footnotes. Table C8 is a graph of unemployment and sickness beneficiaries by month for benefit year 2019-2020. Table C9 shows the distribution of experience based contribution rates, by number of employers, for 2020.

Payments for maternity under a separate program were discontinued by amendments adopted in 1968. However, provision was made for payment of sickness benefits to female employees prevented from working because of pregnancy or childbirth. The sickness benefit data in this section include such payments.

The unemployment and sickness beneficiary tables for benefit year 2019-2020 include all payments made by June 30, 2020. Benefits are paid for compensable days of unemployment or sickness at a daily rate equal to 60 percent of the employee's last daily rate of pay in the base year, subject to an \$80.00 maximum and a \$12.70 minimum in benefit year 2019-2020.

In accordance with the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, unemployment and sickness benefit amounts reflect a reduction of 9.2% under sequestration for days of unemployment and sickness after February 28, 2013, a reduction of 7.2% for days after September 30, 2013, 7.3% for days after September 30, 2014, 6.8% for days after September 30, 2015, 6.9% for days after September 30, 2016, 6.6% for days after September 30, 2017, 6.2% for days after September 30, 2018, and 5.9% for September 30, 2019.

The most important qualifications of the data for each table are shown in footnotes to the table.
