3. Railroad retirement average Tier 2 monthly compensation based on											
the maximum 60 months of earnings		8,260		8,325		8,387		8,448		8,509	

a. Benefits are based on an employee who began work on January 1 of the year the employee attained age 22 and either retires or dies at age 65. Benefits reflect early retirement reduction factors for retirement prior to social security normal retirement age based on year of birth. An employee retiring at a later age or beginning work earlier could be entitled to higher benefits than those shown.

- c. Including supplemental annuity.
- d. Based on maximum creditable earnings, including year of death.
- e. In computing the benefit to be paid in the year of retirement, social security does not include earnings in the year of retirement. Such earnings may later increase the benefit under the recomputation rules.

Note: Maximum taxable compensation during 2022 is \$147,000 for tier 1 and \$109,200 for tier 2. Maximum taxable compensation for social security during 2022 is \$147,000. Benefits are rounded to the lower dollar.

Bureau of the Actuary and Research U.S. Railroad Retirement Board December 2021

b. Employee is assumed to retire in the month before the first payment is received. For the calendar year 2022 calculations, the year of birth for the employee is assumed to be 1957 with a social security normal retirement age of 66 years and 6 months.
