Tax Rates and Maximum Taxable Earnings Under Social Security, Railroad Retirement and Railroad Unemployment Insurance Programs, Continued

- 1 Before tax credit. Employees received a credit of 0.3 percent in 1984. The self-employed received a credit of 2.7 percent in 1984, 2.3 percent in 1985 and 2.0 percent in 1986-89. The trust funds received general revenue equivalent to the credits.
- 2 Before payroll tax holiday. In calendar years 2011 and 2012, the tax rate for employees and the self-employed was reduced 2 percentage points. The trust funds received general revenue equivalent to the reduction in revenue.
- 3 Beginning in 2013, employees pay an additional 0.9 percent on earnings above \$200,000 (for those who file an individual return) or \$250,000 (for those who file a joint return). This additional HI tax rate is not reflected in the tax rates shown in the table.
- 4 Based on automatic adjustments in proportion to increases in average earnings levels.
- 5 Earnings bases are monthly through 1984 and annual for 1985 and later. October 1, 1973 was the effective date for the allocation of railroad retirement taxes by tiers, subject to a moratorium for certain railroad labor organizations. The tier I tax rate was set equal to the current social security tax rate.
- 6 This temporary tax applied to employers until all pre-October 1985 loans from the Railroad Retirement Account were fully repaid with interest on June 29, 1993. Earnings bases are annual through 1988 and monthly for 1989-1993.
- 7 Taxes are paid only by employer. From 1948 through 1988, the rate for a calendar year was based on a graduated schedule depending on the preceding September 30 account balance (including administration fund). Except for certain commuter railroads, the rate for 1989-1990 was fixed at 8.0 percent. Beginning in 1991, each employer's rate is experienced-based, with a minimum of 0.65 percent and a maximum of 12 percent, or 12.5 percent if a 3.5 percent surcharge applies due to a low account balance.
- 8 Taxes are paid only by employers. The supplemental annuity tax was repealed for calendar years after 2001.
- 9 Beginning in 1991, the portion of the tier I tax rate which does not exceed the social security HI tax rate is applied to earnings up to the HI maximum taxable amount. In 1993, a 1.45 percent tax applied to earnings up to \$135,000 and a 6.2 percent tax applied to earnings up to \$57,600.
- 10 Beginning in 2004, the tier II tax rate will be determined annually from a tax rate schedule based on the average account benefits ratio. The average account benefits ratio is the average for the 10 fiscal years preceding the calendar year of the ratio of the fair market value of the assets in the Railroad Retirement Account and the National Railroad Retirement Investment Trust as of the close of each fiscal year to the total benefits and administrative expenses paid from those accounts during the fiscal year. Employer tax rates can range from 8.2 percent to 22.1 percent. Employee tax rates can range from 0 percent to 4.9 percent.
